

I-Smile **AT SCHOOL**

I-Smile@School is a program that provides preventive dental care to elementary students in Iowa schools.

I-Smile@School provides dental screenings, dental sealants, fluoride varnish, and oral health education for elementary school students.

By providing dental services in a school setting, we are better able to reach children with important preventive care. In the end, they will experience fewer cavities, which helps them concentrate on learning instead of mouth pain.

Consents for I-Smile@School will be sent out to parents in the fall. The dental program takes place during the school day, but students miss very little class time.
